A stroll along the Mežakla plateau

Discover the natural and cultural heritage of this mysterious plateau

A stroll along the Mežakla plateau is an excellent idea for those hiking lovers who wish to discover the wooded and scenic world between Blejski kot and Zgornjesavska dolina. The hiking trail connects the starting points in Kočna and Podmežakla (Jesenice). They are marked with 1 and 11 on the map. Planski vrh (1299 m) is the highest point of the trail. In both directions, the trail is initially quite steep until it reaches the plateau. After that, it turns into an undemanding, relatively straight trail that mainly runs along the northern edge of the plateau. Several interesting sights can be seen along the trail that put the mysterious Mežakla plateau alongside the rich natural and cultural heritage of the upper Gorenjska region.
